***Creating Data Is Your  
Business; Online Data  
Backup & Recovery Is Ours!***

Is your data disaster recovery backup system continuously backing up your data throughout the day? If not, all of your critical daily data additions and changes are at significant risk. Research shows that traditional tape-based backup systems are completely deficient.

American Archiving offers a better option. Our online backup service enables everyday computer users to easily backup, restore, and access their online backup data. Our software automatically and continuously (24/7) monitors selected folders looking for data additions and changes. When a change is detected, it is immediately extracted, compressed, encrypted and then securely transferred to our secure online backup data center.

Data is at the core of your business. Protect it wisely, securely and efficiently. Emails, customer records, documents, invoices, payroll, etc. – It's all significant data you cannot afford to lose. A data disaster can be crippling for your business, and the cost of downtime is typically in the tens of thousands of dollars.

## **Why Online Backup?**

**Continuous:** Backup online automatically and continuously throughout the day (24/7). Most tape backup systems are scheduled to backup once a day in the evening. How much critical data would you lose if your server crashed at 4:00 p.m. Why leave all your company's daily data changes and additions vulnerable between scheduled backups.

**Convenient & Simple Management:** Manage all backup operations for local and remote servers from one centralized administrator and from any desktop browser. Schedule desired backups with ease, eliminating the need for tape rotation, labeling and indexing. User easily restores 'point-in-time' versions of files without loading tapes one after the other.

**Secure & Off-Site:** Data backup is off-site and maintained in a secured fire proof location. Data is stored using encryption and your account is protected by your personal security code, ensuring complete security and privacy.

**Scalable Storage:** After the first fully compressed data backup, only incremental data changes are immediately extracted, compressed, encrypted and then securely transferred to our secure online backup data center. As your data grows we will automatically accommodate your backup needs.

**Fast Restore:** Files are restored in minutes.

**Economical:** No installation costs and equipment to buy.

## Service Highlights

Manage your data backup from any desktop browser.

Backup online workstations, servers & desktops to a disaster recovery backup system located at a secure off-site fire proof location.

Backup all kinds of data: Documents, emails, Exchange, SQL, etc.

Military strength (up to 448 bit) encryption of your data before it leaves your machine!

Powerful Compression.

After the first backup, continuous intelligent backup of changed data only.

Supports Windows, Linux, Mac OSX & FreeBSD.

Multiple scheduling options including continuous data protection & multiple full backup scheduling.

Point in time restores allow you to simply point on a version and click to restore.

## How It Works

No installation costs and equipment to buy.

We simply install an agent on each computer (workstation /server) that you wish to protect. After the initial configuration, backups happen automatically and continuously. We can monitor and manage the process remotely without accessing your data!

Our online data backup service is trouble free, secure, and fully automatic. Contact us for more information on data backup.

## Other Services

**Document Scanning & Electronic File Storage:** Let us create an electronic records storage and retrieval solution for you. We can either scan your files to a compact disc or our off-site secured server in all electronic formats including PDF and TIF. Ask us about our economically efficient scan-on-demand service and start building your imaging archive on an as needed basis.

**Hard Copy File Storage:** We can store your files off-site at our warehouse facility and customize a pickup and retrieval program to suite your needs.

**Document Shredding:** We provide a full range of document shredding services to protect your confidential information and to help your business comply with state and federal laws. Clients receive written certificates of destruction for all shredding services.
